

Stormwater – Green Infrastructure Bus Tour

Westmoreland Conservation District hosted a bus tour of Green Infrastructure sites. Participants from Westmoreland and Allegheny counties were on hand to learn about effective stormwater management. The tour was funded in part by the PA Association of Conservation Districts, Inc., through a grant from the PA Department of Environmental Protection under section 319 of the Clean Water Act Administered by the EPA.

Jamie Storey, engineer with the Municipality of Monroeville, and Amy Miller, watershed specialist with the Allegheny County Conservation District discuss a retrofitted detention pond.

John Heyl, and engineer with Lennon Smith and Souleret Engineering, discusses the permeable asphalt project at Southmoreland High School

(Add videos showing permeability of asphalt and vacuuming)

Annie Quinn, executive director with the Jacobs Creek Watershed Association, shows participants permeable pavers and rain gardens that front the Scottsdale Public Library

The tour stopped at the West Overton Village for lunch.

WCD staff were on hand to talk about the swales, riparian buffer restoration, and monitoring project at the Westmoreland County Community College.
