

2021 Version--:60 Conservation Tips PSA

Did you know there are easy steps you can take to make a difference in your community?

Every day, the state's sixty-six conservation districts work to prevent pollution in Pennsylvania. But we can't do this alone. We need your help. Conservation can start in your yard!

By taking a few simple steps, we can all make a difference:

- Don't mow to the edge of a stream or lake;
- Plant a "buffer" zone of plants, trees, or shrubs next to waterways; and
- Don't dump yard waste near a stream.
- These simple actions will help to:
 - Stop pollution from entering streams and lakes;
 - Absorb rain to control flooding; and
 - Prevent erosion.

Together, we can conserve our resources. Remember, it's up to all of us to be good stewards of our commonwealth.
