

2021 Version--:60 Conservation Tips PSA

Did you know there are easy steps you can take to make a difference in your community?

Every day, the state's sixty-six conservation districts work to prevent pollution in Pennsylvania. But we can't do this alone. We need your help. Conservation can start at home!

Did you know that salt is harmful to fish and other aquatic life?

By taking a few simple steps, we can all make a difference:

- Limit the amount of salt and de-icers you use on driveways and sidewalks to prevent pollution from entering streams and lakes;
- Remove snow first;
- If there is salt left on the driveway after the ice melts, you used too much! Sweep it up and throw it away;

Together, we can conserve our resources. Remember, it's up to all of us to be good stewards of our commonwealth.
