## **Items for Consideration 2024 Spring PACD Region Meetings**

The following items were proposed by the PACD Ways and Means Committee during their meeting on January 18, 2024, and the PACD Legislative Committee during their meeting on January 17, 2024. These items will go to PACD Executive Council for a vote in July of 2024.

### **From the PACD Ways and Means Committee: Discussion on PACD Requesting a \$500 Donation from Conservation Districts**

*The PACD Ways and Means Committee moved to recommend discussion for the potential of requesting a \$500 donation from the conservation districts to PACD as a short-term solution to the financial shortfalls currently existing.*

### **Proposed Policy from the PACD Legislative Committee: Increase to Growing Greener Plus Grants Program Administrative Expense Limitation**

The 5% ceiling on administration expenses for Growing Greener grants, which seemed feasible at the time it was passed, currently does little to cover the actual administrative costs of implementing a Growing Greener grant. Reporting requirements have become increasingly time-consuming, costs have increased significantly, and restrictions on other funding sources have increased. PACD, conservation districts, and other organizations that rely on grant funding are struggling to cover administrative and overhead costs.

*The Growing Green Plus Grants Program offered by the PA Department of Environmental Protection (DEP) funds projects aimed at reducing nonpoint source water pollution through local, watershed-based planning, restoration, and protection efforts. The PACD Legislative Committee supports legislation to increase the administrative expense limitation for the Growing Greener program to a minimum of 10% to better cover administrative expenses.*

### **Proposed Policy from the PACD Legislative Committee: Mandatory Riparian Buffers**

This policy is proposed in response to HB 1275, which would prohibit land development in riparian buffer areas within 100+ feet of certain waterways in order to mitigate flooding issues and water pollution. The proposed legislation includes an exemption for agriculture.

*PACD recognizes the significant environmental benefit of riparian buffers along surface bodies of water. PACD supports education and incentives for voluntary installation of riparian buffers as opposed to legislation allowing administrative agencies of the Commonwealth and municipalities to require buffers along any body of water more restrictive than current law and regulation.*
