

The Berks County Conservation District is hiring a Mosquito-Borne Disease Control Technician and a Resource Conservation Technician. This is one position with dual responsibilities, it is full-time with benefits after the 90-day introductory position.

Mosquito-borne Disease Control Technician

General Statement of Duties: Responsible for implementing mosquito control, tick surveillance, and Education and Outreach activities regarding Integrated Mosquito Management (IMM) throughout Berks County. Key duties include fieldwork, data collection and entry, mosquito control activities, and coordination with neighboring counties and Pennsylvania (PA) Department of Environmental Protection staff.

Resource Conservation Technician

The individual holding this position is a member of the Resource Conservation team. This Team is responsible for implementing several state-delegated regulatory programs. Those programs include Chapter 92 (NPDES), Chapter 102 (Erosion Control), and Chapter 105 (Dam Safety and Waterway Management). In addition, the Urban Resource Conservationist is responsible for ensuring that the required output measures are achieved in accordance with the delegation agreements. The Resource Conservation Technician is supervised by the District Manager.
