

2020 Version--:60 Conservation Tips PSA

Did you know there are easy steps you can take to make a difference in your community?

Every day, the state's sixty-six conservation districts work to prevent pollution in Pennsylvania. But we can't do this alone. We need your help.

By taking a few simple steps, we can all make a difference:

- Plant native plants;
- Native plants don't need to be watered as much as non-native plants which saves you money;
- Native plants attract pollinators;
- They will fare better through frost and drought;
- Plant native bushes and trees along streams to help prevent water pollution and flooding, and;
- If you have grass, set your mower height to three inches and never mow grass near a stream.

Together, we can conserve our resources and keep Pennsylvania growing. Remember, it's up to all of us to be good stewards of our commonwealth.
