

2021 Version--:60 Conservation Tips PSA

Did you know there are easy steps you can take to make a difference in your community?

Every day, the state's sixty-six conservation districts work to prevent pollution in Pennsylvania. But we can't do this alone. We need your help. Conservation can start at home!

By taking a few simple steps, we can all make a difference:

- Properly maintain your car to prevent leaks;
- Recycle used motor oil and antifreeze; and
- Use a commercial car wash instead washing cars on your driveway.

These simple actions will help to stop pollution from entering streams and lakes.

To reduce emissions:

- Keep your tires properly inflated;
- Replace dirty air filters; and
- Avoid "topping off" your gas tank.

Together, we can conserve our resources. Remember, it's up to all of us to be good stewards of our commonwealth.
